

# 4T Trade

## With The 10 Point Trade Technique

The "4T Trade" with the "10 Point Trade Technique" is a first way to find regular successful trade before coaching.

### 4T Trade Instructions

**1<sup>st</sup> T – Find The Trend** – Observe the 240 minute pressure chart for its direction. The trend is stronger when more steep and tight.

**2<sup>nd</sup> T – Find The Trade** – 60 or 30 min charts.

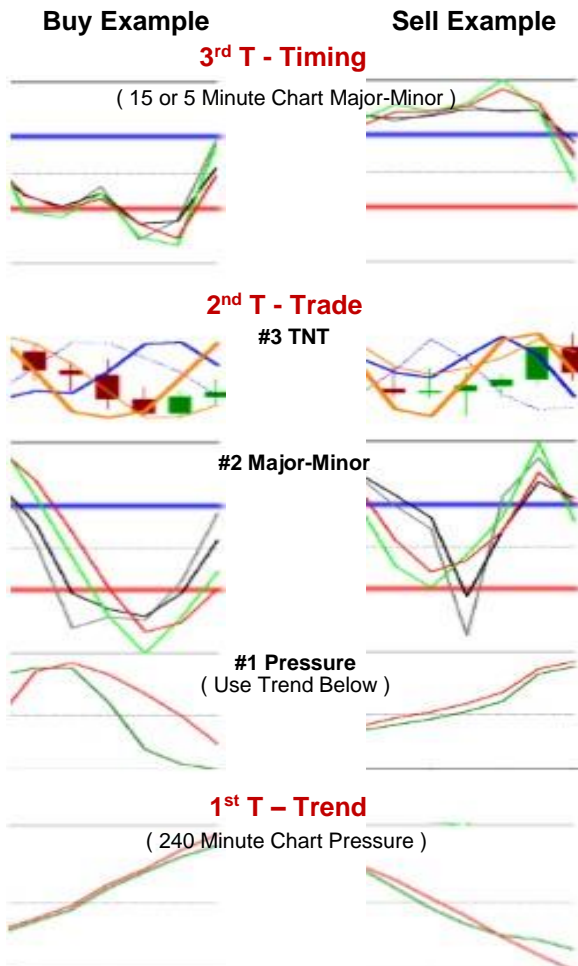

**Ten (10) Point Trade System** (right column):  
 #3 Total Number Threshold (TNT) Indicator.  
 #2 Major – Minors Indicator.  
 #1 Pressure Indicator (start here first).

**3<sup>rd</sup> T – Find The Timing** – Review the 15 and 5 minute charts and, if possible, wait until the Core (mainly Major-Minor) Indicators agree with the trade direction for ideal timing.

**4<sup>th</sup> T – Take The Trade:**

- Enter the trade (mark time and price).
- Set a 5 PIP Take Profit based on support and resistance.
- Set a Stop Loss at 25 – 35 PIPs based on local support and resistance.

### Indicators And Price Action

### 10 Point Trade Instructions

**Start with #1 Pressure below and work up through #2 and #3 Sum contributing points / disregard non-contributing points.**  
**Buy Signal: +7 of +10 points with +1 point from each indicator.**  
**Sell Signal: -7 of -10 points with -1 point from each indicator.**

**#3 TNT (Total Number Threshold) Indicator** (top indicator)

A confirmatory indicator leading (fast) indicator.  
 4 Rules / Points – 2 of 4 (if others strong) best with 3 or 4 of 4.

- +1 – Buy – Thick Orange Pointing Up
- +1 – Buy – Thin Orange Pointing Up
- +1 – Buy – Thin Blue Pointing Down (means up or buy)
- +1 – Buy – Thick Blue Pointing Down (means up or buy)

- 1 – Sell – Thin Orange Pointing Down
- 1 – Sell – Thick Orange Pointing Down
- 1 – Sell – Thin Blue Pointing Up (means down or sell)
- 1 – Sell – Thick Blue Pointing Up (means down or sell)

**#2 Major – Minor Indicator** (middle indicator)

**Majors [G (buyers) / R (sellers)] = Market Makers.**

**Minor [G (buyers) / B (sellers)] = Smaller Traders.**

Sets trade timing and direction as a leading (fast) indicator.

3 Rules / Points – 3 of 3 points required.

- +1 – Buy – Below the Red Over-Sold
- +1 – Buy – Turning Up
- +1 – Buy – Topping, Majors and Minors are Crossing

- 1 – Sell – Above the Blue Over-Bought
- 1 – Sell – Turning Down
- 1 – Sell – Topping, Majors and Minors are Crossing

**#1 Pressure Indicator** (lower indicator)

**Green Line = Those tending to buy.**

**Red Line = Those tending to sell.**

The first to consider and the most predictive of trade direction.

A lagging (late) indicator, so use larger chart pressure (eg. 240).

3 Rules / Points – 1 of 3 points required.

- +1 – Buy – Trending Upward (direction of last several candlesticks) \*
- +1 – Buy – Tending Upward Edge (stronger if tighter and steeper)  
If Slightly Down Edge (diverging, wide, and weaker)
- +1 – Buy – Topping, Green Crossing On Top – Next Candle Green.

- 1 – Sell – Trending Downward (direction of last several candles) \*
- 1 – Sell – Tending Downward Edge (better if tighter and steeper)  
If Slightly Up Edge (diverging, wide, and weaker)
- 1 – Sell – Topping, Red Crossing On Top – Next Candle is Red.

\* 70% of the indicator significance AND 70% of trade significance.

**Tip** – Take fewer higher quality trades. There is always a better trade coming. You will make more money by trading carefully and maximizing company funding for a larger trade account.

# 4T Trade

## With The 10 Point Trade Technique

### Presentation Source:

- Lite meetings
- Lite recordings
- Previous courses
- Current approved courses
- Current practices of others
- Attempts to answer my own questions

### Foundational Concept:

- Avoid (or never) trade against the trend.
- Don't trade against the pressure.
- This is often where the conversation ends.
  
- Within a time chart it is rare for the Pressure to match with the Major-Minor and TNT Indicator signals.
- Must find the pressure or trend direction elsewhere.
- Many now using the 240 minute chart pressure.

### Emergency of the 4T Trade:

- Best trade circumstances come from multiple chart trade method.
- Even early students can understand this with just a moment explanation.
  
- Find the Trend.
- Find the Trade.
- Find the Timing.
- Take the Trade.

### 10 Point System

- Emerged – Not from a system perspective, but from a separate indicator perspective.
  
- 3 rule Pressure analysis (described everywhere (Lite, Courses, etc.))
- 3 rule Major-Minor analysis.
- 4 rule TNT analysis.
- 10 rule Core Indicator set collective rules.

### Emerged First Trade System

- 4T Trade as a general practice.
- 10 Point Trade Technique as a simple rule based trade identification method.
- Clean Chart available for visual, physical, etc. engagement.

### Chart Systems

- 5 chart chartbook.
- 7 chart chartbook (either works, but the 7 chart system provides a little more insight and clarity).
